MASQUERADE

F2 PANSY, MASQUERADE

The same breeding techniques which have made Color Carnival Pansy so immensely popular, have been applied to our own special strain derived from the famous Oregon Jumbo type. This new production method has resulted in beautiful flat blooms of huge size. Striped and shaded blooms are varicolored in the typical Jumbo manner, in combinations of rust, yellow, blue, violet, pinkish mauve and lavender. Color patterns of the flowers include bi-colored, shaded, blotched and edged types.

Plant habit is vigorous yet reasonably compact, not often exceeding six inches in height. MASQUERADE is earlier than the Swiss types, and by comparison, is up to fourteen days earlier flowering than Color Carnival.

This new Pansy should be offered where there is a demand for an early mixture of brighter and lighter colors, together with largest flower size.

Price: \$18.00 per oz., \$180.00 per lb.

FALL FESTIVAL

DAHLIA FALL FESTIVAL

Here is a Dahlia that can easily be grown from seed, and will be of interest both to the home gardener and bedding plant grower. Ideal as a bedding plant, it is taller than the Unwin type and has long stems which are ideal for cutting.

Most distinctive is the dark glossy foliage almost reminiscent of the deep copper shades of maple and beech leaves.

The flowers are double, semi-double and a small proportion of singles. Flowers are in the shades of the Northern woods in the Fall; the crimson, red and orange of the maples and sumacs; the yellows and apricots of poplars and birch, with the rich purples of wild berries for added spice.

Plants grow to about two and one-half feet high, with healthy vigorous growth. Flowers are from three to four inches across, carried on long strong stems. Also available in certain countries as "Autumn Festival."

Price: \$2.50 per oz., \$25.00 per lb.

NEW HORIZON

PETUNIA NEW HORIZON

A fine new blend of Tall California Giants, noteworthy for the new range of colors not seen before in this class, coupled with almost complete uniformity of flower size.

New colors include rich strawberry, delicate Dresden pink, orchid lavender, old rose, copper rose, white; many have harmonizing throats veined and flushed with purple, brown and green shades.

NEW HORIZON is produced from family lines taken from our breeding ground. Both F2 and open-pollinated types are represented, to combine the best and rarest colors provided by both techniques.

Flowers are of extra large size—up to six and seven inches across, and are slightly ruffled. Plant growth is strong and vigorous. The first flowers are borne on a central upright stem, with base branches following to form a mound-like plant.

NEW HORIZON is our suggestion for the best Tall Giant of California strain to offer to your most critical plant growers.

Price: \$10.00 per 1/16 oz., \$30.00 per 1/4 oz., \$100.00 per oz.

CARROUSEL

F2 SNAPDRAGON CARROUSEL

Like a merry-go-round on a color wheel! All colors represented in Snapdragons are represented in this outstanding mixture, offering the vigor and uniformity of hybrid plants, at reasonable cost.

Grown from selected F1 Snapdragons, chosen after extensive trials, this new mixture offers a wide color range and exceptional hybrid vigor for superior garden performance.

Plants are early, fast growing, uniform in height at about thirty inches, with flowers evenly spaced on long stems.

This is a mixture which will delight the home gardener, and which bedding plant growers can offer with complete confidence. The many plus qualities of CARROUSEL Snapdragon are unrivalled by any other strain.

Price: \$2.00 per oz., \$20.00 per lb.

COLOR CARNIVAL

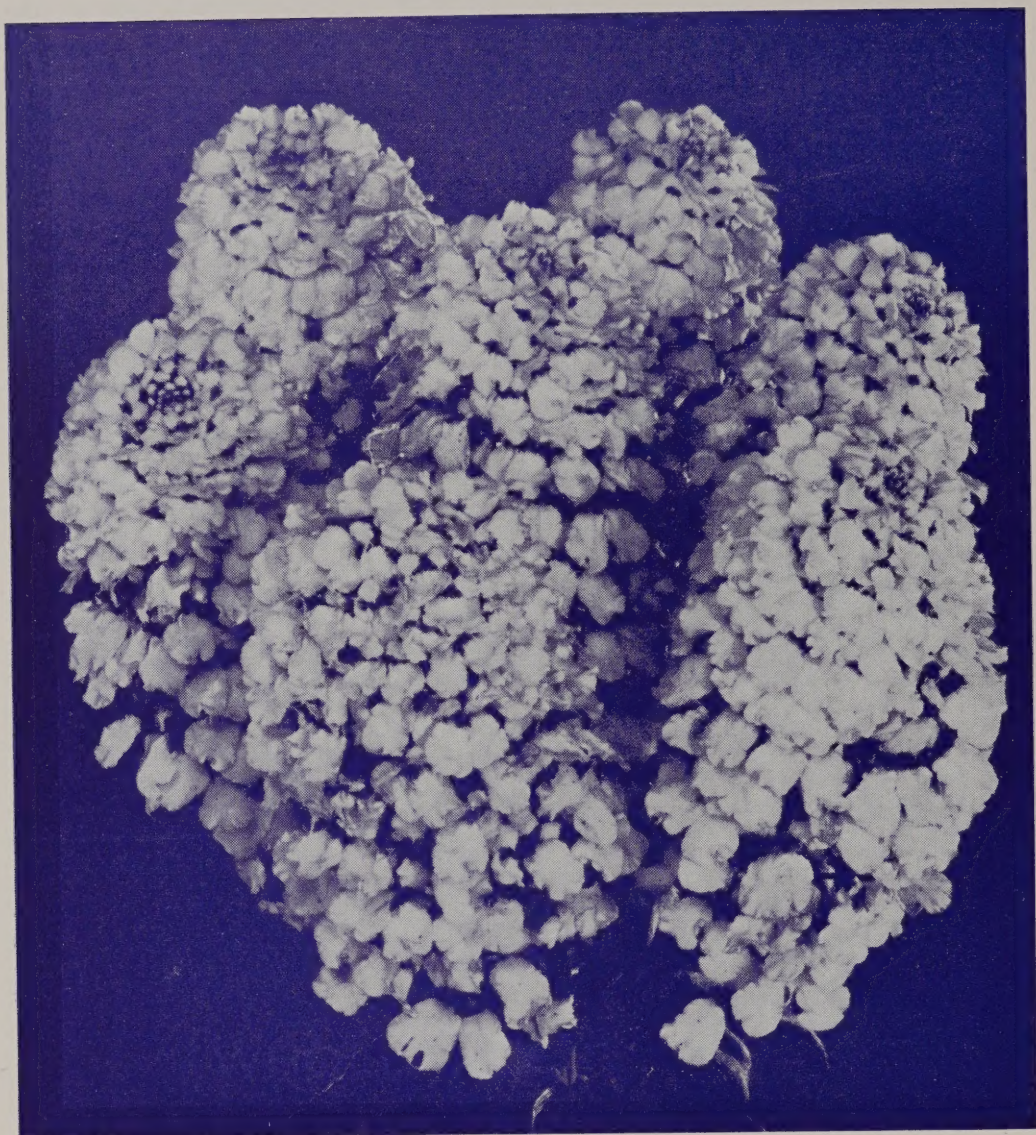

F2 PANSY, COLOR CARNIVAL

As specialists in American grown Pansy, we are most proud of the reception accorded this fine hybrid strain.

For two years bedding plant growers have witnessed the performance of this revolutionary new American Pansy. Not only is the germination of the highest standard of California grown Pansy seed, but the quality has proven in many instances to be finer than that obtainable in the best European specialty strains of Swiss type Pansy. A magnificent color range of heavy texture on husky plants is produced by Color Carnival. Flower size is among the largest, if not greater in many instances. A thoroughly satisfying strain from the standpoint of all who have viewed it, used it in the garden, grown it for bedding plant sales.

A SUPREME CANDYTUFT

ICEBERG

Since the introduction of this fine Candytuft in 1954, florists have acclaimed it as the finest large flowered Candytuft, bringing higher prices for its spikes, and has proven to be the top Candytuft offering of the past twenty years.

Slightly shorter than regular Hyacinth Flowered types, it nevertheless can easily be forced, and will at all times produce larger blooms than other strains.

For further details, please turn to page 21.

THE EARLIEST GARDEN STOCK EVER DEVELOPED

Sensational for Warmer Areas

TRYSOMIC 7 WEEK STOCK

Earliest Stock ever developed, noted in trials for its high performance in areas where heretofore Stocks were not considered a garden item.

The plant first throws a central spike of bloom some 6 inches or more in height, then goes on to produce numerous side branches throughout its growing period, eventually forming an attractive branching plant from 12 to 15 inches in height. A brilliant color range from white through pink and rose, deep crimson, dark blue and purple.

Under normal conditions, it will bloom in flats or pots for bedding plant sale. In addition to this attribute, it is also Trysomic (high double) producing in excess of 86% doubles when properly handled.

We have cultural leaflets available for distribution to bedding plant growers. Small quantities will be handled free of charge. Introduced in 1955, this Stock is now available in a fine blend of colors, *and refer you to page 52 for further details.*

WALLER FLOWERSEED COMPANY

ON QUALITY AND PRICE—we are specialists in general production of a complete listing of flower seeds. We spare no effort to produce the finest quality strains, the purest seed deliveries, and stand firmly behind each item we deliver. The basic ideal on which our company has prospered throughout over forty-five years of its existence has been that of producing the highest quality flower seed, strain for strain, that scientific knowledge can produce. It has been our endeavor throughout these years to charge fair prices for this merchandise, and we have been quite successful in this regard as the record will show. Truly low cost methods of flower seed production invariably are based upon low quality of strain and seed milling. Compared with other agricultural seeds, flower seeds are relatively young in their development. Flower seeds, therefore, are far more variable in nature and require a higher degree of concentrated breeding work to maintain top quality strains. The slightest let down can provide decidedly inferior results. It is also a fact that pure line strains of flower seed generally yield far less per acre. The ultimate consumer in all cases wants and will look for the highest quality obtainable. Year in and year out, the small additional cost of our high quality production will repay you in increased sales and repeat business based upon customer satisfaction.

PROMOTION—we distribute all pertinent information to the leading garden magazines, leading newspaper garden departments and such other publications as are considered worthy agencies.

We are in constant contact with packet manufacturers and underwrite production of lithographed packets of the finest new items of our development introduced each year.

PHOTOGRAPHS—in black and white are available of all items in our listing at a nominal charge of \$1.00 each. These are suitable for the production of half-tones. Color transparencies are available of many items in our listing at a cost price. New transparencies will be made by us on request on a custom basis.

TRIAL SAMPLES—all items in our listing are available for trial purposes as we are glad to enter competitive comparison trials of our items with those of other sources.

WHOLESALE GROWERS AND BREEDERS

TERMS—these prices effective on all sales immediately, minimum charge per item 50c. Three ounces or under at ounce rate, four ounces or over at pound rates.

All seeds are quoted f.o.b. Guadalupe, California, 60 days acceptance net, less 1% cash thirty days. Invoices payable in U. S. dollars. All overdue accounts subject to sight draft without further notice. Bags and containers will be charged at cost and are not returnable.

We reserve the right to change prices in this list at any time.

For every contract order that we shall accept, we have sufficient land planted to produce the desired quantity of seed under normal conditions.

Should the outcome of the crop be lower than our estimation, orders will be filled pro rata only. Crop failure or any other cause beyond our control releases us entirely from delivery.

We warrant, to the extent of the purchase price, that Seeds or Bulbs sold are as described on the container, within recognized tolerances. We give no other or further warranty, expressed or implied.

ORDERS—clear instructions are appreciated, otherwise we shall ship via the cheapest and most direct route.

SPOT ORDERS—will be handled and shipped the same day as received.

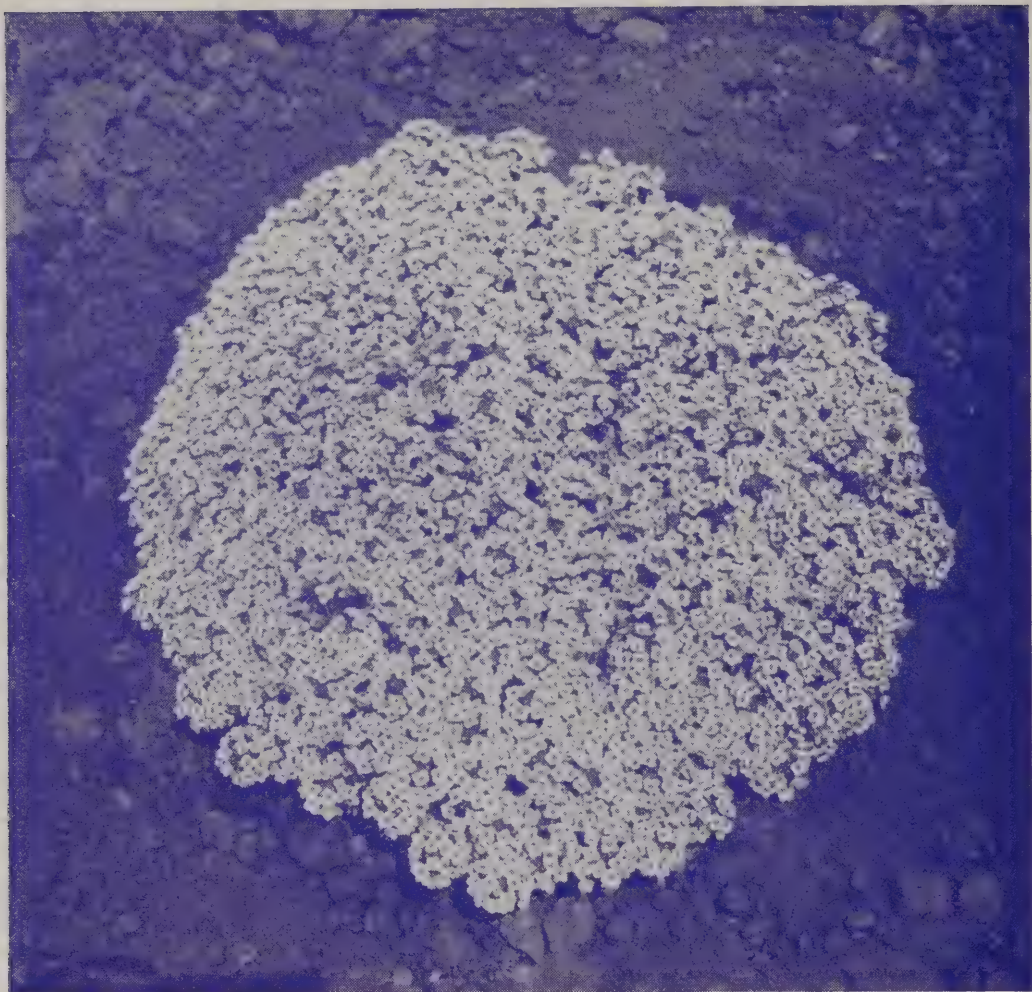

INSURANCE—will be covered by us and charged at cost, unless otherwise instructed. Our policies have excellent coverage including all risks. Please advise us if shipments arrive in damaged condition or are apparently lost in transit.

WE ARE WHOLESALE GROWERS AND SERVE ONLY
THE SEED TRADE.

CARNATIONS

Dianthus Caryophyllus—15,000 seeds per oz.

For several years we have been acknowledged leaders in the production of American grown Carnation seed. The varieties we offer have proved to be the best types for American gardens. They are carefully grown in well isolated plantings to assure trueness to color and type.

ANNUAL BLOOMING VARIETIES

ENGLISH GIANTS (J. M. Bridgeford Strain)

Mixed colors, superior size blooms comparable to greenhouse grown carnations if secondary buds are removed. 18 in. \$2.00 \$20.00

MARGUERITE, 20 inches.

Choice Mixed Colors, slightly smaller blooms than Chabaud type 1.20 12.00

CHABAUD'S GIANT IMPROVED, 20 inches.

These Carnations bloom five months from time seed is planted and continue throughout the summer. The plants are of robust upright habit; they form ten to twenty stalks, bearing huge flowers of fine form; they come about 95% double, remarkably true to color, and are clove scented.

Apricot (Safron)	2.50	25.00
Cardinal Red (Sparkler) scarlet.....	2.50	25.00
Crimson (Nero) maroon.....	2.50	25.00
Deep Rose (Rose Queen deep).....	2.50	25.00
Deep Salmon (Aurora or Coppery Salmon).....	2.50	25.00
Fantasy, striped and variegated mixed colors.....	2.50	25.00
Flesh Pink (Rose Queen pale).....	2.50	25.00

ORANGE SHERBET

A very interesting addition to Chabaud Carnations. Petals are striped and flushed with scarlet on an orange apricot ground. Sure to be a favorite color.

Price per oz., \$2.50; per lb. \$25.00

SPECIAL STRAIN

GOLD MEDAL HYBRIDS

This fine volume favorite of home gardeners has within the past few years become vastly improved. Tailored to meet the American market for an inexpensive type of high quality Delphinium. This is now primarily regrown Pacific Hybrids. Though some loss of quality from Pacific Hybrids is to be expected, nevertheless this does provide a finer mixture than heretofore offered for regular garden usage on a wide scale.

Price per oz., \$1.50; per lb., \$15.00

WALLER FLOWERSEED COMPANY

Our New Pacific Giant Delphinium are grown each year from originator's newest strains.

WHOLESALE GROWERS AND BREEDERS

Flower Seeds	Price per oz.	Price per lb.
-----------------	------------------	------------------

DELPHINIUM

Huge flowers two and one-half to three and one-half inches in diameter, beautifully spaced on well balanced spikes. Thin woody stems. Comparatively mildew resistant, this strain is practically 100% double.

We are pleased to offer a complete list of the originator's newest and finest strains, all carefully grown by us each year from the originator's cross-pollinated seed.

This remarkable strain grows to over 6 feet in height in our fertile fields in the Arroyo Grande Valley.

ANNUAL

TRIUMPH SUPREME

A W-F introduction of rare merit. Reports from over the world indicate that this variety is such an early blooming strain that it more rightly deserves to be listed as an annual, earlier than Indian Summer and blooming with Indian Spring. Frilled graceful double blooms in a very wide and pleasing color range. Proven over 4 years usage to be one of the finest Hollyhocks ever introduced.

DWARF GIANTS OF CALIFORNIA

W-F EXTRA DWARF FORMULA MIXTURE

W-F Special Strain. A supreme strain for the pot-plant grower. Extremely early to bloom. Noted for its base branching which provides up to three blooms at the earliest date, completely covering the foliage and providing a more saleable plant. Blooms at about 3 in. Huge blooms of top quality size. Maintained in separate colors in our fields to control color balance. Our program for this strain includes lath house production of our planting stock under strictly controlled conditions in pots.

Price per 1/16 oz., \$6.00; per 1/4 oz., \$18.00; per oz. \$60.00

In response to many requests, we are now offering the following separate colors as used in this fine strain. At the same price.

Rose

-----------------	----------------------------------	------------------	------------------

TRYSONIC STOCK

42,000 seeds per oz.

Based on studies commenced by Dr. H. B. Frost at Cornell University in 1915, and furthered through consultation with our late co-founder Dr. J. H. Franklin during the '20s, the genetic theory of Trysonic doubles in Stocks was developed and proven by 1930 to be capable of producing 85% doubleness from seed.

In addition to this desirable trait, the percentage of any planting can be increased up to 100% at the four-leaf seedling stage as at this period of growth the young singles are noticeably weaker and can be readily distinguished from the vigorous double flowering plants.

For proper handling, we have leaflets available for general distribution to grower trade, giving our recommendations to obtain proper results.

STOCKS

Matthiola—Gilliflower—Annual—18,000 seeds per oz.

For many years W-F has been the world's leading grower and introducer of the finest strains of Double Stocks. Our method for maintaining doubleness assures you of only "High-Percent Double" Stocks, and our selection of varieties includes only those proven to be the most desirable.

As long ago as 1932 we received fifteen various awards from The Royal Horticultural Society of Great Britain for our doubleness and trueness of our Stocks. Every year we continue to carry on the immense amount of detail work necessary to maintain our foremost position.

DWARF TEN WEEK, (Double Large Flowering), 1 ft.

Ten Week Stocks are so named because they bloom in ten weeks after planting seed. Those in heavy type are the varieties we have selected as being the best of the brightest colors. In our test plantings they all grow and bloom together.

per lb.

SWEET PEAS

Lathyrus odoratus—Annual Climber—340 seeds per oz.

Sweet Peas are the largest single selling item in our production. We feel this is due in great part to the very special attention given Sweet Peas in our breeding work and production program, as well as our carefully selected list.

This year we have instituted a most careful color reclassification, and have eliminated the often misleading but glowing descriptions in favor of pure factual reporting of color according to our standards. Our new color descriptions can be followed with confidence by the most discriminating buyer.

We have indicated the preferable variety by use of a solid dot. •

NEW EARLY MULTIFLORA VARIETIES

Six to seven blooms are not uncommon under proper cultivation. Extremely vigorous vines with long sturdy stems. These strains bloom seven to eight days later than most regular Early Flowering Sweet Peas. Therefore, replacement of regular Early Flowering varieties by these Multiflora varieties should be considered in view of this fact in addition to which the color range as yet available leaves something to be desired.

Beauty Rose, rose (white ground).....	\$3.00

Sweet Peas	Price per lb.
---------------	------------------

NEW CUTHBERTSON FLORIBUNDA VARIETIES

The latest addition to the Spring Flowering mid-season class of Sweet Peas, extremely vigorous, long stemmed and heat resistant.

As rapidly as a complete color range becomes available, we feel these should replace the regular Cuthbertson varieties due to the fact that the Floribunda varieties possess all the attributes of the regular Cuthbertsons, but will under proper conditions produce five or more blooms per stem of better formed flowers.

Ann, rose (white ground).....	\$2.00

SWEET PEA COLOR CLASSIFICATION

This new Color Classification includes the new Multifloras and Cuthbertson Floribundas, and we feel should prove of great help to you in clarifying what is now a complex listing of Sweet Peas.

Classification by type and season of bloom is lined up across the top of each page in order of earliness from left to right. Exact color groups are listed horizontally, and a few moments of reading will show you that you can easily compare colors within each different group across the page with certainty that each color group contains only identical colors.

EARLY 15 weeks to bloom	EARLY MULTIFLORA 16 weeks to bloom	CUTH- BERTSON 17 weeks to bloom	CUTHBERTSON FLORIBUNDA 17 weeks to bloom	LATE SPENCER 19 weeks to bloom
